WCA dimer, validated dt = 1.25e-4, K = 256, 16 paired seeds (5600-5615): median and IQR; FR from t = 0 (green stops at t = 20, dash-dot line)
(a) free energy
(b) mean force
(c) RC marginal (full domain)
t = 20: ABF warm-up end + estimator reset; FR stop of the green arm
ABF
FR from t = 0 (continuous)
FR on 0 ≤ t < 20, then ABF
$e_F(t)$ [kT]
$e_{F'}(t)$ [kT per unit z]
$e_\xi(t)$, full domain [$z^{-1/2}$]
t [reduced time units]
