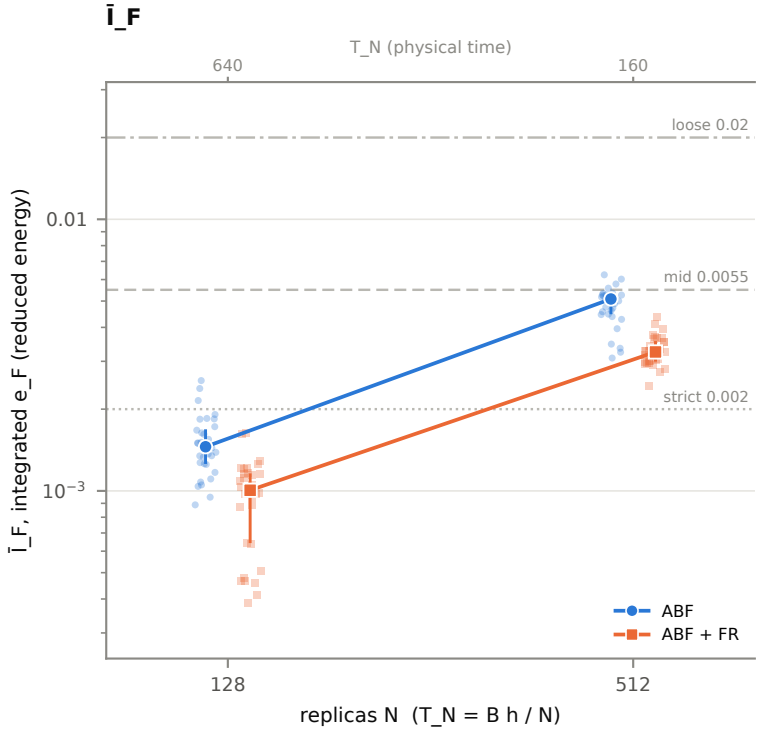
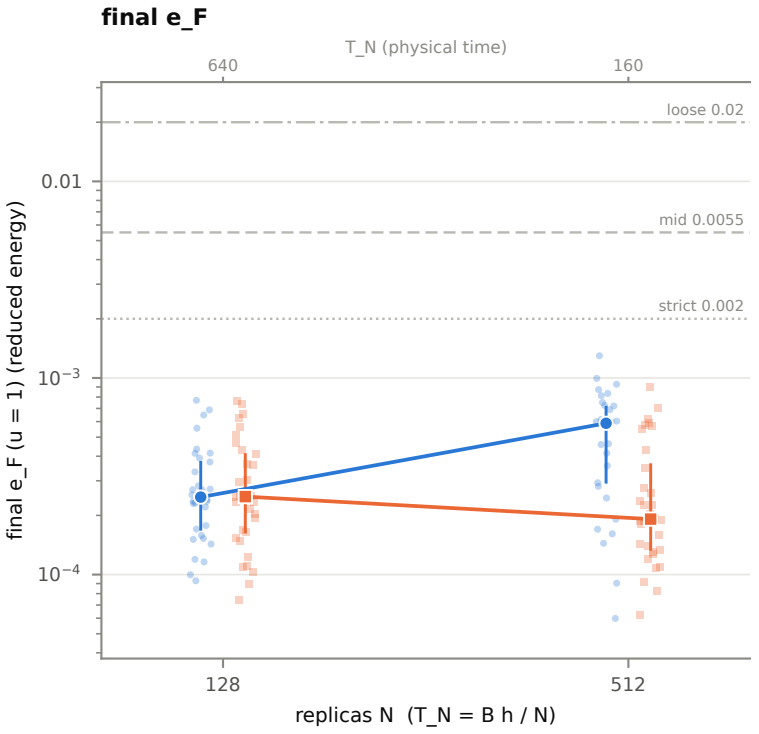
gateway shift_lam128: absolute free-energy error vs N

Equal total budget per arm per seed: B = N × n_steps = 3.2768e+09 walker-steps at every N (h = 2.5e-05, T_N = B h / N); 32 seeds per (N, method). ABF and ABF + FR: seed median, IQR and per-seed points.





gateway shift_lam128 · S1_free_energy_abs_vs_N · status: all planned (N, seed, method) complete · FR is not defined at N = 1 (ABF only, by design).
Markers: seed median; whiskers: IQR over seeds; faint points: individual seeds. Grey lines: the frozen strict / mid / loose thresholds of e(t) (shown for scale on the integrated errors as well).
Reference floors: Ibar_F: EM bias of F vs analytic 1.0e-09 lies below the axis; final_e_F: EM bias of F vs analytic 1.0e-09 lies below the axis.
