

Conditional y law at representative x: $\text{II: } \lambda = 0.25$ (transverse mobility / 4), $N = 2048$

Final walkers pooled over seeds, standardised by the exact $Y | x$ law; KS D vs $N(0, 1)$ (nominal: FR copies are not independent), mean and var of z (95 % seed-bootstrap CI of var; exact: 0 and 1, EM frozen-x var $\sim 1/(1 - \lambda k h / 2) \leq 1.013$).

EXPLORATORY: this quantity is not preregistered (SCIENTIFIC_PLAN sections 4 and 6)
