

D1 FR death and birth positions: I:  $\alpha = 0$  (purely energetic barrier in x; deterministic force),  $N = 512$   
 Rates per FR opportunity per walker in 0.1-wide x bins (5 production bins); seed median and IQR. Dotted lines: region boundaries  $x = \pm 0.5$ . y ranges shared by every cell of this experiment at this N.
