

Conditional y law at representative x: l: alpha = 0 (purely energetic barrier in x; deterministic force), N = 512

Final walkers pooled over seeds, standardised by the exact Y | x law; KS D vs N(0, 1) (nominal: FR copies are not independent), mean and var of z (95 % seed-bootstrap CI of var; exact: 0 and 1, EM frozen-x var ~ 1/(1 - lam k h / 2) <= 1.013).

EXPLORATORY: this quantity is not preregistered (SCIENTIFIC_PLAN sections 4 and 6)
